# Why choose FALCON?

With a Falcon at the heart of the kitchen, the kitchen is always the heart of the home. That's why you'll find a Falcon in more homes across Europe than any other range cooker. So, why buy a Falcon? If being Britain's No.1 range cooker manufacturer isn't reason enough, read on to find out why we're in more homes than any other.

We are proud to say that our range cookers are manufactured in Britain, at the same location in Royal Leamington Spa where the very first range cooker was built back in 1830.

## 01

### Style and choice

We offer the biggest range of style, size and fuel types making it easy for you to find the perfect Falcon for your kitchen.

## 03

### The right ingredients

It can take weeks to carefully craft a Falcon. The frame is triple folded, creating a unique encasement for some of the highest quality components on the market. The highest gauge steel is pressed, cut, washed, polished, and finally finished with an eco-friendly, durable and scratch-resistant coating so you can enjoy your Falcon range cooker for years to come.

## 02

### A family of over 1 million owners

When you buy a Falcon, you're joining our family. Today, much has changed at Falcon but our principle of creating, beautiful, functional, market leading appliances built by hand in Royal Leamington Spa continues to underline our success.

## 04

### Quality and testing

Falcon is Europe's No.1 range cooker brand, and is highly rated by consumers as well as international committees such as the Plus X Award, who distinguish selected products with prizes for innovation, quality and functionality.

## 05

### When it comes to cooking, experience matters

There's over 185 years of manufacturing excellence at our factory in Royal Leamington Spa. Generations of local families have all played their part in making Falcon the success it is today. Our people are passionate and proud of making the best range cookers on the market. We call it... **Built from experience.**

# SPECIALIST features

## GRIDDLE

Made from robust cast aluminium, the griddle plate sits snugly on top of the gas hob, when required. The flat plate is ideal for cooking bacon and French toast, while the grooved plate provides fat drainage, offering a healthier way to sear steaks, burgers and fish.

## TEPPANYAKI GRIDDLE

Cook healthy food Japanese-style with the unique Teppanyaki-style griddle plate that fits snugly over the burners. It is coated for non-stick easy cleaning.

## BRIDGING-ZONE

Our MK2 induction hobs feature a bridging-zone that can be used as two separate cooking zones, one large cooking zone or as a base for our innovative induction griddle.

## MULTI-ZONE

Choose between two ceramic 1.1kW cooking zones, or slot our durable non-stick griddle plate over the top to provide a healthy cooking surface.

## MULTI-RING BURNER

All our range cookers with gas hob feature a powerful multi-ring burner, ideal to create authentic Asian cuisine. Most of our cookers are supplied with a wok cradle specially designed for the multi-ring burner.

## INJECTION STEAM CAVITY

A dedicated 35L atmospheric steam cavity with additional grill and descale functions and pre-programmed settings for the preparation of vegetables, fish and meat. The cavity is also suitable for sous-vide cooking.

## GLIDE-OUT GRILL

Positioned on smooth-action telescopic runners, our glide-out grill does exactly that. Not only is it easier to check up on your food as it's grilling, but it's also safer; it reduces the risk of pulling the grill out too far. Depending on the model, the glide-out grill is equipped with a two-way or four-way grill trivet.

## PROVING DRAWER

Our proving drawer is a unique feature in the world of range cooking; it helps you to effortlessly rest and rise your dough before baking. And it doubles as a handy storage drawer.

## LARGE OVEN CAPACITY

With an average main oven capacity of 79L and A-rated across the board Falcon range cookers lead the way for size and performance.

## SCRATCH-RESISTANT FINISH

Our finishes are eco-friendly, durable and will last for years to come. On our range cookers we only use top-quality coatings supplied by the global leader in the field and applied at our factory in Leamington Spa.

Not all features are included on every model.

# FALCON multifunction oven

Falcon multifunction ovens offer up to eleven functions for really flexible cooking. The ovens combine fan and conventional functions with grilling, base heat and browning elements, all of which can be used individually. Use the base heat to crisp the base of your pizza; fan grill whole fish; brown a pasta bake; cook your roasts using the fan assisted function or bake using the conventional function.

## FAN ASSISTED OVEN

Uses the top and bottom oven elements alongside the fan. It creates different temperature zones - with the hottest being at the top; ideal for crisping and browning the top and bottom of dishes as well as cooking them through

## FANNED GRILLING

Uses the top oven element in conjunction with the fan. Fan grilling provides a grilled effect without the need to turn the food. Grill with the door closed.

## CONVENTIONAL OVEN

Traditional cooking method using top and bottom heat and zoned cooking. Much hotter at the top than the bottom. Ideal for traditional baking, e.g soufflé.

## FAN OVEN

Uses an element at the back of the oven. The fan draws air from the interior of the oven, heats it up and forces it back into the cavity. The heat within the oven is evenly distributed making it ideal for multi-level cooking (batch cooking or the cooking of different foods at the same temperature)

## BROWNING ELEMENT

Uses the exposed top element only to create a very high intense heat for browning and toasting.

## DEFROST

Uses the fan only - no heat. Cold air is drawn from the frozen food to speed up the defrosting process.

## BASE HEAT

Uses only the bottom element. Base heat can be used for slow, gentle cooking or, when turned up to high, for crisping up the base of dishes.

## DUO

Setting to produce perfectly baked pastry without the need for blind baking.

## DELICATE

Function to prepare delicate dishes such as meringues or soufflé.

## ECO

Energy saving, time-based function for foods requiring 45 minutes cooking or less. Especially suitable for ready prepared meals and non-yeast baked food like cookies and brownies.

## RAPID RESPONSE

Preheats fan ovens up to 30% faster than when using the fan alone. Allows cooking to start immediately.

Not all functions are included on every model. Please refer to the product pages for full product details.

# FALCON

## hob types

### GAS HOB

Our gas hobs come with up to six powerful burners with cast iron pan supports. A variety of sizes accommodate a range of different sized pots and pans, from small omelette pans to large boilers for moules or soups. There's a multi-ring burner for high-heat cooking, perfect for stir-fries. On selected models there's also a wok cradle and a griddle for extra cooking flexibility. If you want gas but don't have access to a mains supply, all of our appliances with gas hob can be converted to LPG using a kit that is fitted at point of installation by a specialist gas installer.

### INDUCTION MK1\* HOB

Our standard induction hob has five cooking zones with nine power settings. As it's the pan that heats up and not the hob, induction is safe, controllable, instant, precise and energy efficient. Added benefits include low temperature settings for melting chocolate or a slow simmer, along with power boost, residual heat indicator and child lock for peace of mind for families with young children.

### INDUCTION MK2\* HOB WITH BRIDGING ZONE

Taking induction a step further, our Induction system MK2 is available on an exclusive selection of range cookers. Low temperature settings can be held for two hours until the hob switches itself off, perfect for keeping food warm. There's also a bridging zone with two large cooking areas which can be used independently or can be linked to hold our induction compatible griddle, a large fish kettle or a collection of pans. This hob also features power boost, pan detection and boil dry protection.

### CERAMIC

For those who prefer ceramic, our classic ceramic hotplates come with up to six cooking zones to accommodate different sized pans. Added features include hot hob indicators for safety and an easy wipe-clean, seamless surface.

All Falcon range cookers feature electric ovens.

\*People with cardiac pacemakers or implanted insulin pumps must make sure that their implants are not affected by the induction hob (The frequency range of the induction hob is 20-60kHz)

*Making your choice...*

Whether you want a traditional style or the clean, sophisticated lines of something a little more contemporary, a Falcon range cooker will become the cornerstone of your kitchen. Distinctive, efficient, highly versatile and made to our exacting standards, every Falcon range cooker is designed to make cooking a pleasure, not a chore.

All Falcon induction models are equipped with our premium induction technology – smart, intelligent and ultra-efficient.

- 1-9

ZONE POWER SETTINGS 1 - 9

Nine power settings giving instant response and full controllability through rotary controls.
- A

AUTOMATIC HEAT UP SETTING

Applies maximum power to the selected zone for a brief period. Ideal for cooking rice and pasta.
- L1

G5MK1 AND G5MK2: PREPARATION SETTING

Pre-set temperature setting of approx. 40 °C. Ideal for gently melting butter or chocolate.
- P

POWER BOOST SETTING

Provides additional power which helps to bring the contents of a pan to the boil quicker and adds greater flexibility and control.
- L2

G5MK1: OPTIMUM SIMMER  
G5MK2: KEEP WARM SETTING

G5MK1 : Pre-set temperature setting of approx. 90 °C. Perfect for simmering soup and stews, or for preparing sauces.

G5MK2 : Pre-set temperature setting of approx. 70 °C. The perfect temperature for keeping food warm once cooked.
- H

RESIDUAL HEAT INDICATOR

A safety feature. The residual heat indicator symbol will appear in the display to show that a zone is still hot; it shows that the cooking zone temperature is above 60 °C and may still cause burns.
- L3

G5MK2: OPTIMUM SIMMER

Pre-set temperature setting of approx. 90 °C. Perfect for simmering soup and stews, or for preparing sauces.
- Key icon

CHILD LOCK

Locks the zones when the hob is not switched on to prevent the unwanted use by children.
- [8]

BRIDGING ZONE

The G5MK2 induction hob is equipped with a bridging function which allows the user to link two of the zones to create a large zone that can be used for for instance a fish kettle or that can hold our special induction griddle.

Available low temperature settings depending on product and model choice.

People with cardiac pacemakers or implanted insulin pumps must make sure that their implants are not affected by the induction hob.

# CHOOSING YOUR hob...

All our ovens are electric. However, you can choose the hob that best suits your preferred way of cooking.

## GAS

The most popular hob fuel choice is gas. Gas offers instant heat that is completely controllable and evenly distributed. All Falcon gas hobs can be converted to accept liquid petroleum gas (LPG) using a conversion kit.

## GENERAL INFORMATION

For further information please contact your local dealer. Details can be found on [www.agafalcon.com](http://www.agafalcon.com)

## CLEARANCES

Allow 5mm on either side of the cooker for fitting tolerance. If fitted near a corner, a clearance of 130mm is required to allow for oven door opening. The cooker should be on site prior to final fitting of units and worktops, to ensure a perfect fit.

## WARRANTY

Falcon appliances come with a 2 year parts and labour warranty (subject to registration).

## CONSUMER SERVICES

If you have any product enquiries, or in the event of a problem with our appliance once it has been installed, please contact the dealer where you purchased your appliance. Please make sure to have your serial number to hand.

## STANDARDS

Falcon cookers are designed and manufactured to a recognised quality management system, which meets the requirements of BS EN ISO 9001 and BS EN ISO 14001 for continually improving environmental procedures.

Falcon cookers comply with the essential requirements of the appropriate European Directives, and carry the CE mark.

All cookers must be fitted by a suitably qualified individual and in accordance with all relevant Standards. Installation guides should be read prior to fitting.

## NOTES
